

GUIDED TOUR THROUGH THE PARK OF THE LANDESGARTENSCHAU

In the afternoon we were guided through the grounds of the State Garden Show.

During the visit, it was explained to us that through the State Garden Show, a river that flows through the park was restored to allow fish to live peacefully. Besides that, many other projects were planned, such as a graffiti wall, some bars for snacks and drinks and other activities aimed at young people, such as fields for different sports and the installation of trampolines.
